

Rental

Customer: **SMET VERHUUR, Belgium**
 Facility: **M&J PreShred 4000M – 8 – HDC**
 Capacity: **Up to 50 tons/h**

"The M&J pre-shredder is more expensive than the other pre-shredders in our catalogue, but it is also in a class of its own. There are certain types of waste where it is simply the only machine that can do the job."

Focus on quality and reliability

SMET VERHUUR was originally started by Stefaan Smet. He felt that there was a need for a specialist in the rental market for large machines for the recycling industry. And he was right because, within a few years, the company has established itself as the absolute market leader in the domestic market. Its success is driven partly by solid industry knowledge and partly by a broadly based demand for various types of waste treatment installations. But there is also a clear procurement policy, where only high-quality machines are purchased. For SMET VERHUUR, it is crucial that the equipment rented is reliable and can last for many years.

The perfect candidate

Naturally, SMET VERHUUR has an extensive machine park. But the company lacked a strong pre-shredder that could take care of the particularly difficult challenges, such as tree roots, mattresses and carpets. Groups of products that often cause problems when they need to be shredded. Their research quickly brought SMET VERHUUR on the track of Metso Waste Recycling's M&J PreShred 4000M and, after a visit to the factory in Horsens - and, not least, a convincing test in Holland of the machine's qualities - Mr. Smet was not in doubt. It was exactly the machine that the company was searching for. It was added to the mechanical equipment and has already proved its worth with several of SMET VERHUUR's customers.

Metso's test machine was the decisive factor

The company

SMET VERHUUR specialises in the long and short term rentals of mobile screening, crushing and wind-shifting equipment and other recycling machines. The company is located near Antwerpen in Belgium and has, in very few years, grown to become the leading supplier in its industry.
